FIELD PLANT FARM

1950

**BERRY & VEGETABLE PLANTS
SEEDS**

Farms Barnsboro

P.O. SEWELL, New Jersey

TO OUR FRIENDS AND CUSTOMERS

We are glad to present our 36th. annual catalogue in its usual modest and sincere form. The many patrons who have been with us since the early days of our business prove that reliable facts followed by satisfaction is our best advertisement.

We take this means of thanking all who have patronized us in the past and assure you of the same satisfaction in the future.

Very sincerely yours

FIELD PLANT FARM

INSTRUCTIONS

TIME TO ORDER *As soon as possible after receiving this catalogue. That is particularly so with berry plants. We can reserve the variety you want and ship as early in the spring as it is possible for you to prepare the ground for them. This is the first important step toward a successful berry patch. When planting in the early spring you are certain of getting a good stand without watering and nursing them along, which is often required later in the season when it becomes hot and dry.*

ALL OUR PLANTS ARE FRESHLY DUG: Packed in light ventilated crates with plenty of damp moss and shipped promptly, guaranteed to reach you in good condition. Should they arrive in poor condition which might happen through delay in transit or some cause beyond our control, accept the plants and have your Express Agent or Postman make note of same. Advise us at once and we will make good all just claims, when made on receipt of goods.

GUARANTEE

We guarantee our stock to be true to name and free from disease. We use every precaution to keep it so and believe we have been able to do so almost one hundred percent in the thirty five years that we have been in business.

Should any prove otherwise we will replace them on proper proof but in no case will we be responsible for any greater amount than the purchase price of stock.

PAYMENT should be made to the Field Plant Farm by Money Order, Bank Draft or Personal Check. However we will reserve your order for a deposit of one fourth of the total amount. The balance can be paid before shipment or will ship with balance C.O.D.

STATE OF NEW JERSEY

DEPARTMENT OF AGRICULTURE

TRENTON

No. 337

Trenton, N.J.

September 1 1949

THIS IS TO CERTIFY that we have this 19th. day of August, 1949, in accordance with the provisions of Title 4, Chapter 7 of the Revised Statutes of the State of New Jersey, as amended by Charter 111, P. L. 1941 caused to be inspected by a duly appointed inspector the nursery stock growing in the L.E. Field nursery of L. E. Field proprietor, at Barnsboro, in Gloucester County, New Jersey, and have found same apparently free from San Jose scale, and other dangerously injurious insect pest and destructive plant diseases.

This certificate expires Sept. 1st. 1950, and covers only stock in nursery when examined.

HARRY B. WEISS Chief, Bureau of plant Industry. W. H. ALLEN Secretary of Agriculture.

TAKE NOTICE

STRAWBERRY PLANTS are in moderate supply this year. It would be advisable to make a second choice when ordering as it will save both you and I time if we should be out of one variety that you order. All our berry plants have been inspected for the Red Stele disease by the New Jersey Department of Agriculture. We will ship berry plants until May 20th.

A Field of our STRAWBERRY PLANTS

VARIETIES of STRAWBERRIES

AMBROSIA; Late. Considered by many to be the largest, latest and best Strawberry introduced. The berries are very large, semi-pointed, rich red in color and delicious flavor. Ripens 3 weeks later than Premier. Fruit stems are very rigid holding fruit up from the ground which helps keep them clean.

SPARKLE: Midseason. It makes a good plant bed of medium size plants with dark green foliage, very disease resistant and has a long picking season. The berries are medium to large in size and a glossy light red in color, with a real green calix. Very good for the quick freezer.

PATHFINDER: The result of a cross between Premier and Aberdeen, very vigorous in plant growth, taking a sufficient number of plants for a good fruiting bed, also very resistant to plant diseases. Will produce a large crop of fruit medium to large in size, uniformly smooth and regular in shape, good color, moderately firm flesh, a good flavor.

BLAKEMORE: Early. A good early variety that has been thoroughly tested. It is a vigorous grower, making plenty of good strong plants. Berries are larger than the average extra early variety, bright red in color, good flavor and a firm flesh, making it a good commercial berry.

PREMIER: (or Howard No. 17) Early. This is one variety sold under either name. Size medium to large, good color and a firm berry, plants very vigorous making good beds and more resistant to frost than other varieties, you can not go wrong on them.

SUCCESS: Medium Early. An old reliable that we still recommend for the home garden. It makes good strong plants and plenty of them to form a good fruiting bed. The fruit is extra large, excellent flavor and has a long picking season, in fact all any one could desire in a home berry or near by market. It is not a good shipper.

FAIRFAX

The fruit is large, best of flavor, rich red in color with bright green caps. It starts picking a few days after the Premier. It is exceptionally firm and stands distant shipping well also desirable for the home garden or the road side market as it has the quality and appearance.

CATSKILL

A midseason variety popular with many growers. It makes plenty of good strong plants, a heavy producer of large berries of good quality, light red in color, with a large green calix making it very attractive and sells well on the market.

STARBRIGHT

The plants are vigorous and healthy with strong crowns, The berries are large, hold well through the fruiting season, with bright glossy red color. Very firm and high quality berry.

FAIRFAX PLANTS

DORSETT

This berry has become a favorite with many growers. It ripens with Premier. makes a vigorous growth of foliage, not as large a plant as the Fairfax but makes them more freely often requiring thinning and spacing.

The fruit is large bright red in color, good flavor and firm texture, making it a good all around variety for the market or the home garden.

ABERDEEN

This variety out yields all others under favorable conditions. The fruit averages large throughout the season, a bright shiny red in color, uniform in size and shape and has a beautiful green calix that adds much to its appearance.

GANDY. Per. Late—The latest of all summer varieties, plants strong and vigorous, berries extremely large and extra firm and good color. Not considered the best table berry but being extra fancy and a good shipper it is a profitable commercial variety.

LUPTON. Per. Late—This berry originated in South Jersey and has become very popular, it makes extra large plants and a sufficient number to form a good fruiting bed. It is a handsome berry of excellent quality and we can recommend it, either for commercial planting or the home garden.

BIG JOE. Per. Mid-Season—An extra large berry, coloring all over alike, the texture is one of the best, giving it excellent shipping qualities, making it a favorite with many growers.

WM. BELT. Per. Midseason—The best yet of its season. Plants vigorous and prolific, fruit, medium to large, the best of all flavors, most perfect in shape, brilliant glossy red and ripens all over alike.

ROBINSON

A midseason variety, also known as Scarlet Beauty, berries are medium to large, firm and a bright red color with green calix. It makes a good fruiting bed picks about one week after the Premier.

TEMPLE

The berries are large, blunt cone shape, smooth, uniform and have large attractive caps, The foliage is quite tall and resistant to the leaf scorch disease. It makes a good bed and picks almost as early as the Blakemore.

FAIRLAND

A New midseasen variety. It is highly productive, picking a few days after Premier. The berry is firm, red and compares with Premier in size. The plants are vigorous and it makes a good fruiting bed.

Bunch of MASTODON Plants

JULY MORN

This is a late berry, the plants are good size with enough for a good fruiting bed. fruit medium to large, very red clear through. It is excellent for canning or the quick freezer.

Everbearing Varieties

The everbearing has many advantages over the summer varieties. If planted in the spring they will produce a crop of fruit in the late summer and fall of the same year they are planted. The buds should be removed until the last of July so they will become thoroughly rooted before fruiting.

They will produce fruit until freezing weather and then you will have your fruiting bed for another year.

Another great advantage is, if you have a late freeze the everbearing will produce another set of bloom, you pick your crop of berries just a little later than usual.

MASTODON

We believe this variety to still be the leader in everbearing strawberries. Very vigorous plant growth making a limited number of exceptionally large plants. The fruit is large, of good quality and attractive in appearance. The one variety that will grow most any where.

GEM

This everbearing variety has become very popular. The plant is medium size and a very vigorous grower. It is very productive, fruit medium to large, light red in color and very firm in texture holding up well.

STREAMLINER

Probably receiving more publicity than any other everbearing strawberry of recent introduction. We have a limited number of plants to offer this year.

PREPARING COLD FRAMES

CABBAGE

Yellow Resistant Strains

We are offering the best that can be produced in cabbage plants, by using seed of the yellow resistant strains. The disease has spread continuously over the country. In fact so severe in some sections that cabbage growing had been discontinued, until intensive investigation had revealed the fact that this disease could be controled. Today they are growing the finest kind of cabbage crops on the same land, by using this seed from yellow resistant strains.

For best results, use our seed grown from the original seed of the yellow resistant strains. Jersey Queen, Marion Market, Ahead Select, Wisconsin Ballhead, Wisconsin Alseason, Bugner, Racine Market, Flat Dutch, Globe, Red Hollander, Savoy and Golden Acre.

Early Cabbage Plants

The first lot of cabbage plants we have to offer are the drilled plants from cold frames, which are usually ready by the 20th. of April. We will have the Jersey Queen, Golden Acre and Marion Market.

Field Grown Cabbage Plants

Cabbage seed is sown in the open field in the month of March. These plants will be ready to ship early in May. We make continous sowings to have a good supply of plants through the season. You will notice a lower price on the field grown plants as the cost of producing them is less when grawn in the open field.

TOMATO

Early Tomato Plants

Our first supply of tomato plants will be transplanted plants from the coldframes, which are ready after May 5th. The next to be ready are the drilled plants from the coldframes. They are ready about the 15th. or 20th. of May at a much lower rate. We will have the following varieties in coldframes. Valient, Rutgers, Marglobe and Stokesdale.

Field Grown Tomato Plants

The main crops of tomato plants is sown in the open field. They are drilled thin so as to make good strong plants about eight to ten inches high. They will be ready the first week of June. We will make several sowings to keep a supply on hand throughout the entire season.

You will notice that the price is lower on these plants owing to the lower cost of producing them in the open field.

We will grow the following varieties. John Baer, Marglobe, Rutgers, Stone, Scarlet Topper, Stokesdale, Red Plum and Yellow Egg.

Broccoli, Lettuce, Brussel Sprouts and Beet Plants.

Our first supply of these vegetable plants are the drilled plants from the cold frames. They are ready after the middle of April. After the middle of May we can fill orders from the field grown plants at a lower rate. Will grow the following varieties. Lettuce: Big Boston, Romaine, New York and Iceberg. Beets: Early Egyptian and Detroit Dark Red. Brussel Sprouts: Long Island Imp. Broccoli: Calabrese Improved.

CAULIFLOWER

The first lot we will have to offer will be the drilled plants from the cold frames. They are ready about the middle of April. After the middle of May we can fill orders from the field grown plants. We will grow Early Snow Ball and Dwarf Erfurt.

CELERY

Our supply of celery plants are grown in the open field only. We are usually prepared to fill orders after June 20th. We will grow the following varieties. Golden Self Blanching, White Plume, Winter Queen, Giant Pascal and Easy Blanching.

SWEET POTATO

We will have a good supply of Sweet Potato plants and will be prepared to fill orders any time after the 1st. week of May. We will grow the following varieties. Ubriver and Kelly which are yellow, the Jersey Red and Yams.

EGG PLANT

Egg Plant are more difficult to grow than most other plants. It requires much more care and extra warmth to grow them, in fact they should not be set in the open field until the weather becomes quite pleasant. Varieties; Black Beauty and Florida High Bush.

PEPPER

Pepper plants are grown in the cold frames only, as the field plants would be entirely too late to be of any use. The transplanted pepper plants will be ready by May 15th. and the drilled plants by May 25th. at a much lower rate. Varieties; Ruby King, Ruby Giant, World Beater, California Wonder, Cheese Pepper, Long Hot and Cherry Hot.

ASPARAGUS ROOTS

7

Our Roots Are Grown From High Grade Seed

Heavy Crown Asparagus Roots

Asparagus beds last for a number of years, the profit during those years depends on the foundation of the bed.

The whole secret is good thrifty roots from the best seed obtainable. What we have to offer is a select strain of Martha Washington which produces a large stalk more resistant to rust than others and cuts more colossal grass than any other variety including other Washington strains.

Asparagus Roots Transportation Prepaid

2yr.	No. 1 Roots	1.40	2.00	3.00	12.00	20.00	90.00

Thrifty Rhubarb Roots

We have a little booklet (how to plant) free, just ask for it when you order.

RHUBARB

This is one of the earliest crops of the season, it is easily grown. A bed will last for a number of years.

We will have two varieties this year, the Red Victoria which grows large cherry red stalks and Ruby which grows medium size ruby color stalk.

Our supply of roots is good this year, the 1yr. will run from $\frac{3}{4}$ to 1 inch. 2yr. 1 to 2 inches. 3yr. 2 inches up at the crown.

3yr.	No. 1 Roots	1.75	2.50	4.25	7.75	15.00	

Horseradish Roots

One of the easiest crops to grow

Horseradish grows well in any soil. If planted in the early spring it will make large roots, ready to dig by early fall. Horseradish can be dug any time that the ground is not frozen, or left until spring and it will keep increasing in size throughout the winter.

It should be planted in a three foot row about twenty inches apart in the row. They are very rampant in habit of growth, out yielding all others and a pure white when grated.

We are growing the Maliner Kern variety which is superior to all others. We have a limited supply of exceptionally nice roots six to eight inches in length.

Horseradish Roots Transportation Prepaid

12	25	50	100	500	1000	5000
\$0.50	\$0.90	\$1.50	\$2.00	\$8.00	\$15.00	\$70.00

After November 1st. we will have roots for grating, write for prices. To keep these roots bury them in the soil, or put them in your root cellar.

Raspberries

We have a moderate supply of Raspberries

ST. REGIS: Red. One of the oldest in everbearing raspberries. Ripens with the earliest, flesh firm and meaty, a good old standby.

INDIAN SUMMER: Red The best everbearing raspberry. It has excellent flavor, bears heavy crops of large berries, strong upright canes that do not freeze as quick as some other varieties.

LATHAM: Red. One of the strongest and most vigorous growers, yielding good crops of large berries. Recommended for the home garden or commercial planting.

CUMBERLAND: Black. The standard of the black raspberries. The fruit is large and attractive, firm and excellent quality. Recommended for the home garden and distant shipping.
